

Standard Plumbing Vent Flanges

Our standard style weather resistant flange incorporates our high quality design features in a complete cover all adjustable unit. The flat top design with 1/2" airspace, slightly smaller in scale, offers a considerable cost savings.

Style 2SM Regular Pitch Plumbing Vent Flanges

Sizes to fit 2", 3", 4", 5" and 6" inside vent pipe diameter.
1/12 to 11/12 (10°- 45°) pitch adjustment.

Style 22SM High Pitch Plumbing Vent Flanges

Our standard style flange incorporates the same high quality weather resistant design features for high pitch applications.

Sizes to fit 2", 3", 4", 5" and 6" inside vent pipe diameter.
5/12 to 15/12 (20°- 60°) pitch adjustment.

Style 1FM Flat Plumbing Vent Flanges

Weather and frost resistant design features built in to our model for commercial and residential flat roof applications. All seams are hand soldered to prevent water penetration.

Sizes to fit 2", 3", 4", 5" and 6" inside vent pipe diameter.
Flat roofs only.

Choose the Timeless Elegance of Copper

All of our flange styles are available in copper or maintenance free galvanized steel. In addition, the weather resistant and standard flange styles offer three factory painted choices to complement the roof color. Custom colors available.
